

Integrated Management System

Quality - Environmental - Safety

Revision 7 - 10/15/2022

EUTRON S.p.A is a company which operates in the EMS sector (Electronics Manufacturing Services) and which has a strong focus on both customer needs and the sustainability of its activities. With its technical skills, its know-how, its use of innovative technologies, and the application of Lean Manufacturing principles to its organizational processes, Eutron S.p.A offers design, prototyping, and production services with test development and support during the implementation of new products.

Eutron S.p.A's mission is to keep up with the technological evolution and future challenges in the world of electronics, automation, and digitalization, offering qualitative and competitive solutions to all its customers. Eutron S.p.A considers its staff to be an essential part of the success of the company, as it is only through the contribution of every staff member that an innovative idea can be created, the solution to a problem can be found, and improvement can be continuous.

Eutron S.p.A's commitment is to supporting the objectives of Quality, the Environment, and Health and Safety according to the following principles:

- ✓ Continuously improving the Integrated Management System in all its parts by a constant adaptation to the evolution of the company, and the application of the relevant regulations and norms;
- ✓ Assuring the application of health and safety measures in the workplace as an element of Eutron S.p.A's corporate culture;
- ✓ Nurturing open and collaborative relationships with local authorities and interested parties, both internal and external to the organization;
- ✓ Maintaining the company's compliance obligations with both the applicable legislative requirements and the standards of the organization;
- ✓ Playing an active role in protecting the environment while carrying out company activities, using all measures aimed at preventing pollution, and promoting environmental improvement objectives with a view to sustainable development;
- ✓ Attaining complete customer satisfaction and the realization of the expectations of all interested parties;
- ✓ Involving workers and their representative as an active part of the integrated management system, through consultation and participation.

An awareness of the importance of proposing and implementing a competitive and sustainable business model means Eutron S.p.A pursues specific strategic objectives:

- ✓ The maintenance of a high-quality standard of products through the definition of appropriate KPIs that allow a timely analysis of the data collected and the achievement of zero defects;
- ✓ An improvement in the efficiency of production processes by focusing on innovation and development through investment in new technologies;
- ✓ The elimination and prevention of non-conformities in every area of the company through inspections and audits and with the involvement of motivated and responsible personnel;
- ✓ The development of improved information, education, and training activities, making all employees aware of their individual obligations and of the importance of their actions in achieving expected results, along with their responsibility for quality, the environment, and health and safety;
- ✓ The identification and elimination of the potential effects of health risks by adopting appropriate solutions for each context, together with the capability of preventing work-related injuries and illness;
- ✓ The maintenance of a constant dialogue with all suppliers, requesting that they commit to the contents of this Policy;
- ✓ The pursuance, where possible, of the reduction of its environmental impact in the consumption of energy and natural resources.

The Management of Eutron S.p.A is committed to support the implementation of this Policy and its contents. The Integrated Policy is checked and updated periodically by the General Management and communicated to all interested parties through the specific dedicated channels.
